

Colon Cancer Canada
Grant Recipients 2009-2013

Name of Principal Investigator	Study Title	Year of Funding	Institution
Dr. Carole Anne Moulton	Interpreting Three-dimensional Structures from Two-dimensional Images: A web-based interactive 3-Dteaching model of surgival liver anatomy	2009	University of Toronto Toronto, ON
Dr. Calvin Law	Optimal treatment of colorectal cancer metastases in the well but elderly patient	2009	University of Toronto Toronto, ON
Dr. Carole Anne Moulton	Circulating tumor cells in patients with colorectal cancer liver metastases	2009	University of Toronto Toronto, ON
Dr. Allan Okrainec	A cost comparison of laparoscopic and open colon resection	2009	University of Toronto Toronto, ON
Dr. Judith Andrea McCart	Molecular Assay of Virotherapy for Colon Carcinomatosis	2009	University Health Network Toronto, ON
Dr. Alice Wei	Exploring Barriers to Access to Care for Colorectal Cancer Metastases: a Mixed Methods Approach	2009	University Health Network Toronto, ON
Dr. David Urbach	Structures of Care in Colorectal Cancer Surgery in Ontario: Assessing hospital level variation and impact on short term patient outcomes	2009	Toronto General Hospital Toronto, ON
Dr. Kartik S. Jhaveri Dr. Ur Metser	FDG-PET/CT and MR parameters in predicting pathologic response to neoadjuvant chemoradiation therapy in rectal cancer	2010	Princess Margaret Hospital Toronto, ON
Dr. Rodney Ouellett	Evaluation of Stool-Based Biomarker for Early Detection of Colon Cancer	2010	Atlantic Cancer Research Institute Moncton, NB
Dr. Maxine Alford	Beyond Transitions: Survivorship Care Plan for Survivors of Colon Cancer	2010	BC Cancer Agency Vancouver, BC
Dr. Jose Teodoro	Role of the GOS2 Gene in progression of colorectal cancer	2012	McGill University Montreal, QC
Dr. Paul J. Karanicolas	Quality of Life Following Resection of Colorectal Cancer	2011	University of Toronto Toronto, ON
Dr. Jennifer Muir	Surveillance after curative-intent resection of colorectal cancer in Ontario: are we misallocating scarce resources?	2012	University of Toronto Toronto, ON
Dr. Kirk McManus	Characterizing the Molecular Basis of Interval Colorectal Cancers	2012	University of Manitoba
Dr. Will D. King	Epigenetic and genetic susceptibility for colorectal cancer	2012	Queen's University Kingston, ON
Dr. Kirstin Lane	A new model to support the adoption of physical activity in colorectal cancer survivors	2012	Camosun College Victoria, BC
Dr. Sevtap Savas	Genomic copy number variations and disease characteristics and outcome in colorectal cancer	2013	Memorial University of Newfoundland
Dr. Myles Smith Dr. Catherine O'Brien	Characterization of hypoxia and causes of radiation resistance and in rectal cancer xenografts	2013	The University Hospital Network, Toronto (Princess Margaret Hospital, Toronto General, and Toronto Western Hospital)
Michael Witcher	Validation of biomarkers predicting resistance to FOLFOX therapy in colorectal patients	2013	The Jewish General Hospital
